DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "**means**" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because of the use of legal phraseology [note the word "**means**" in line 5. Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claim 5 is objected to because of the following informalities: in line 5, it appears that "drive claim" should be replaced with --drive chain--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2-7 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation " the cutterhead drum" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation " said plurality of knives " in lines 4-5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 3 is finally rejected under 35 U.S.C. 102(b) as being anticipated by Sybertz et al. [4,085,494], hereinafter Sybertz.

Sybertz discloses in Figs 1-4, a cutting machine comprising: a drum 1 on a rotatable drive shaft 9 to be driven by a motor; a plurality of cutting blades 3 spaced around the perimeter of the drum, a knife extension apparatus for extending and retracting each of the plurality of knives relative to the periphery of the drum [col 4 lines

9-47].

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 4 is finally rejected under 35 U.S.C. 103(a) as being unpatentable over Sybertz.

The limitations of these claims would have been obvious modifications by one skilled in the art once the basic apparatus was known. For example to provide automatic means to replace manual activity is obvious to a person of ordinary skill in the art.

Allowable Subject Matter

10. Claims 2 and 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

11 Applicant's arguments with respect to claims 2-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
